# Search Page Design

## Search Results - Desktop

The search results page as it appears first time when search is performed. Facet panel always appears on the left side. User can pick any facets. Up on selection of the facets, page should be presented with the new search results without reloading the page.

1 Global Navigation -- customizable as per agency's requirements.

2 Faceted classification -- presents the lists of facets & classifications to help narrow down search results. Detailed design presented under component section.

3 Search bar - let's user enter the search keyword. Up on enter or selection of search button (icon), results are refreshed, without page reload, to present the new results.

# Search Results with Facets Selections

This search results page depicts a view of facets & search results (with badge) when the facets are applied. Everytime user selects (or unselected) a filter, results will be refreshed without page reload.

User should always be presented with facets even when they are irrelevant due to the user interaction with the other facets. When certain facets are irrelevant, they should be presented as disabled, without the count badge.

Those disabled items will appear at the bottom of the list presented to the user.

The screenshot shows the GSA search results page with the following elements:

- Header:** An official website of the United States government. Here's how you know. Privacy policy | Latest updates.

This screen depicts the responsive behavior of the search widget. This widget follows the fixed width for various target devices and corresponding breakpoints.

# Pagination

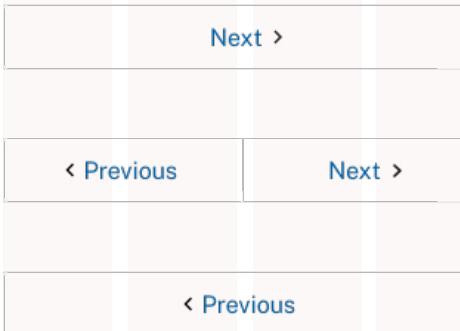

## Pagination Large

This is for Desktop and Tablet devices.

## Pagination Small

This is used for smaller view port, i.e. mobile devices

This screen depicts the responsive behavior of the pagination widget.

# Header & Footer

This screen depicts the responsive behavior of the search result page. Key point to note -- the header and footer follow the fluid layout; and the grid system only applies to the search results content -- facet panel and result content.
